When the source changes

A free four-page manual exercise in source version control

Fictional throughout. Harbor Notes Notebook is not a real product. Sources, drafts, and answers were authored for teaching; they are not manufacturer proof or customer evidence. No Claude run, measured result, or model-behavior guarantee is reported.

Source identity: NOTE-001. Stable facts F01-F08 keep the same section locators S1-S8 across revisions. **v2 is authoritative only inside this fictional exercise.** v1 is superseded; its changed claims must not continue into a revised draft intended for publication.

Fact / section	NOTE-001 v1	NOTE-001 v2
F01 / S1	Harbor Notes Notebook	Harbor Notes Notebook
F02 / S2	A5; 148 x 210 mm	A5; 148 x 210 mm
F03 / S3	96 pages	80 pages
F04 / S4	80 gsm interior paper	90 gsm interior paper
F05 / S5	5 mm dot grid	5 mm dot grid
F06 / S6	Recycled paper cover	Cover material unconfirmed. Withdraw the old recycled-paper claim; no substitute is supplied.
F07 / S7	Listed colors: charcoal and sand	Current listed color: charcoal only
F08 / S8	Stitched binding	Stitched binding

Unknown means unknown

S9 in both revisions: No price, launch date, stock, URL, maker, certification, manufacturing location, warranty, review, sales count, popularity, measured outcome, or performance comparison is supplied. Waterproof, paper-performance, durability, and lay-flat claims are unsupported. Do not derive sheet count or add dimensions, environmental comparisons, or writing and drawing outcomes.

Listed colors do not establish stock. Charcoal-only listing does not prove sand never existed. Unconfirmed cover material does not prove the cover is non-recycled. No current offer is represented.

Audit each assertion

Read the source revisions before editing the eight old draft sentences

1. Read v1, then v2. Identify unchanged facts, corrected values, withdrawn claims, and unknowns. A draft's v1 label records its starting context; it does not certify every sentence.

2. Split each sentence into assertions. Record KEEP, REVISE, or REMOVE; exact revision and section locators; stable fact IDs; the smallest corrected copy; your reason; and its unknown boundary.

3. Preserve supported parts. KEEP repeats the old copy. REVISE changes or deletes only affected assertions. REMOVE leaves New copy empty. Do not replace an unknown with a plausible detail.

4. Compare, correct, review. Complete page 3 before reading page 4. Correct the drafts, then have a human check every retained assertion against v2 before publication. Do not publish this fictional fixture as a real offer.

Old draft inventory - author-written, fictional, not model output

Claim / channel	Old copy (starting context: NOTE-001 v1)
LI-01 LinkedIn	Harbor Notes Notebook is A5 size: 148 x 210 mm.
LI-02 LinkedIn	The notebook has 96 pages of 80 gsm interior paper.
LI-03 LinkedIn	The notebook has a recycled paper cover.
X-01 X	Harbor Notes Notebook: 96 pages, a 5 mm dot grid, and stitched binding.
X-02 X	Listed cover colors: charcoal and sand.
WEB-01 Website	A5 size (148 x 210 mm), with 96 pages of 80 gsm interior paper.
WEB-02 Website	A recycled paper cover, a 5 mm dot grid, and stitched binding.
WEB-03 Website	The notebook is waterproof and has guaranteed lay-flat performance.

Review cue: one old sentence was already unsupported in v1. A source correction does not make every old error a newly outdated fact.

Your impact map

Write your decisions here before comparing with the authored answer key

Action: KEEP / REVISE / REMOVE. **Evidence:** source revision + section (for example NOTE-001 v2 S3), with fact IDs when useful. **New copy:** the smallest corrected sentence; leave empty for REMOVE. **Unknown:** what this evidence still cannot establish.

Claim	Action	Evidence	New copy	Unknown
LI-01				
LI-02				
LI-03				
X-01				
X-02				
WEB-01				
WEB-02				
WEB-03				

CSV companion: the blank CSV also repeats each old sentence and channel, and separates evidence_revision, evidence_locators, fact_ids, revised_text, reason, and unknown_boundary into individual fields. Its decision and evidence cells are empty. Add a reason for each action when completing it.

Human review: confirm that no superseded v1 detail remains and that deleted claims have not reappeared elsewhere.

Authored answer key

Eight decisions: KEEP 1 / REVISE 5 / REMOVE 2. This is authored reasoning, not a model test.

All locators below refer to **source NOTE-001**; v1/v2 identify the revision and S identifies its section. F identifies the stable fact. Page 2 holds the exact old copy. A blank New copy cell means REMOVE.

Claim / action	Minimal new copy	Evidence / reason / unknown boundary
LI-01 KEEP	Harbor Notes Notebook is A5 size: 148 x 210 mm.	v1 S1,S2; v2 S1,S2. F01,F02. Unchanged name and size. No extra dimensions or real product existence.
LI-02 REVISE	The notebook has 80 pages of 90 gsm interior paper.	v1 S3,S4; v2 S3,S4. F03,F04. Correct both values. No sheet count or paper-performance inference.
LI-03 REMOVE		v1 S6; v2 S6. F06. Withdraw material claim. No substitute or environmental claim; unconfirmed is not non-recycled.
X-01 REVISE	Harbor Notes Notebook: 80 pages, a 5 mm dot grid, and stitched binding.	v1 S1,S3,S5,S8; v2 S1,S3,S5,S8. F01,F03,F05,F08. Correct count; retain other facts. No writing outcome, durability, or lay-flat promise.
X-02 REVISE	Current listed cover color: charcoal only.	v1 S7; v2 S7. F07. Correct current listed color. No stock or claim that sand never existed.
WEB-01 REVISE	A5 size (148 x 210 mm), with 80 pages of 90 gsm interior paper.	v1 S2,S3,S4; v2 S2,S3,S4. F02,F03,F04. Correct count and weight. No extra dimensions, sheet count, or paper-performance claim.
WEB-02 REVISE	A 5 mm dot grid and stitched binding.	v1 S5,S6,S8; v2 S5,S6,S8. F05,F06,F08. Delete material; retain grid/binding. No substitute, environmental comparison, durability, or lay-flat promise.
WEB-03 REMOVE		v1 S8,S9; v2 S8,S9. F08. Already unsupported in v1: waterproof and guaranteed lay-flat performance. Neither confirmed nor disproved.

Before publication: compare the corrected drafts with the current source again. This exercise supplies no real product evidence and does not authorize representing fictional claims as a real offer. The CSV key retains the fuller reasons and source locators.
